

Bhawanipur Anchalik College, Bhawanipur, Barpeta, Assam.

Best Practice-1

1. Title of the Practice

SWACHHTA ACTION PLAN (SAP)

2. Objectives of the Practice

Chalking out of institutional Swachhta Action Plan and mobilize the students, teachers and non-teaching staff to participate in it.

3. The Context

Bhawanipur Anchalik College is situated in Bhawanipur, a place which is famous all over the state of Assam as a centre of Baisnavite culture because saint Gopal Aatta established his monastery here to propagate Sankari Nam Dharma amongst the denizens of the area. Besides preaching religious sermons and values, the great seer tried to create consciousness among the devotees on Health, hygiene, sanitation and the benefits of cleanliness. Since then, the area witnessed a historical journey along the path of swachhata. This historical consciousness in the minds of the people gets doubly accelerated on October 2nd, 2014, on this day Swachh Bharat Mission was launched by the honourable Prime Minister of India Narendra Modi to improve focus on hygiene and achieve universal sanitation across the country.

4. The Practice

Keeping in view the above context Bhawanipur Anchalik College started its sincere endeavour to create awareness amongst its students towards Swachhata and inspired all the stakeholders of the institution to work devotedly with a strong commitment to have a Clean and Green Campus. Work on this direction went on smoothly and steadily and in due course of time improvement in sanitation and hygiene, waste management, water management and tree plantation etc. ushered. However to gear up the drive, a Swachhata team has been formed in the college. The team is working hard to achieve its goal towards Swachhata.

5. Evidence of Success

After a rigorous implementation of the action plan towards swachhata, Bhawanipur Anchalik College was awarded the “District Green Champion” award by the MGNCRE, Ministry of Education, Government of India for the year 2020-21 for the successful implementation of the Swachhata Action Plan in the areas of sanitation, Hygiene, Waste Management, water management, Energy management and Greenery management.

6. Problems Encountered and Resources Required

The programme has been implemented in the college without facing any major problems. The team worked sincerely and devotedly establishing perfect coordination between all the stakeholders and achieved a stupendous fit of success in due course of time. The students contributed various species of tree plants to the college at the time of admission and the

college authority with the help the students plant them not only in the college campus but also in the nearby adopted villages.

Best Practice-2

1. Title of the Practice

Awareness and Vaccination programme during Covid-19 pandemic.

2. Objectives of the Practice

To save and protect the precious lives of the people.

3. The Context

The spread of Covid-19 pandemic played a great havoc with the people of India in particular and the people of all over the world in general. Millions and millions of people across the globe lost their lives due to this deadly disease. The Government of India left no stone unturned to curb the spread of the pandemic. The college fraternity very quickly understood the gravity of the situation and felt it imperative for them to do some meaningful and result oriented works to help and to protect the precious life of the people.

4. The Practice

Keeping the context in the mind, the faculty members and non-teaching staff of the college started vigorous awareness programme in the neighbouring villages with a view to erase out the fear psychosis from the mind of the agrarian people regarding the deadly virus. The villagers were made to understand their role and responsibility during this critical juncture and what to do and not to do to avert the loss of precious lives. They were told to follow the covid protocols in letter and spirit, maintain safe distance, use sanitizer and mask, eat healthy diet and avoid public gatherings to put a brake to further spread of the pandemic. Moreover, sanitizers, soaps, masks and vitamin C tablets were distributed among the villagers. Covid vaccination camps were setup with the help of the medical staffs of Bhawanipur Public Health Centres and the villagers were inspired to get them vaccinated on time.

5. Evidence of Success

The awareness programme and the subsequent vaccination drive reaped rich success because of the fact that very few cases of covid pandemic was detected in the neighbouring area of the college. The people realized that precaution is better than cure and this attitude of the villagers ultimately went a long way not only in lessening the number of cases but also saving the precious lives of the people.

6. **Problems Encountered and Resources Required**

The main problem faced by the institution for gearing up the awareness programme was the restriction of movement imposed by the Government agency. It was a little bit difficult for the college authority to get permission from the deemed authority to go to the neighbouring villages to create awareness and to distribute materials to curb the spread of the deadly diseases. Moreover, procurement of sufficient vaccine on time also created some problem. Financial crisis to purchase materials for distribution among the public was there.
